<sup>1</sup> Represents the committed acquisition of a 43% interest in SolarArise at 31 March 2022.

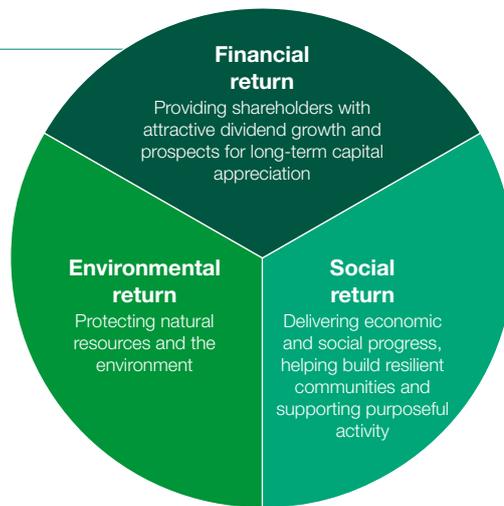

## Investment objectives

To deliver a triple return to investors and other stakeholders, comprising:

- a financial return on investment,
- a measurable environmental return and
- a discernible social return

by investing in a diversified portfolio of unlisted sustainable energy infrastructure assets in the areas of renewable power generation, transmission infrastructure, energy storage and sustainable fuel production in fast-growing and emerging economies in Asia.

### The ThomasLloyd triple return

## Why invest

**Sustainable increasing dividend yield** – an annual target dividend yield of 2-3% in 2022, 5-6% in 2023 and at least 7% on the basis of the Initial Issue Price from 1 January 2024, with the aim of progressively increasing this nominal target

**Attractive capital returns** – to deliver a target NAV total return of 10-12% per annum (net of all fees, expenses and taxes) on the basis of the Initial Issue Price once the portfolio is fully operational on a fully invested and geared basis

**Make a tangible change** – a compelling opportunity for investors wishing to mitigate or balance ESG and climate risks in their portfolio

**Geographical diversification** – a unique opportunity to invest in Asia providing diversification for investors who already have exposure to developed market infrastructure

**Highly experienced Investment Manager** – experience of deploying US\$1+ billion in its target markets, in investments in renewable energy power generation, transmission and sustainable fuel production (700 MW+).

## Sustainable development goals

The United Nations Sustainable Development Goals “SDGs” are a set of 17 goals for sustainable development. They address a range of social needs, including education, health, social protection and job opportunities while tackling climate change and environmental protection. TLEI’s portfolio has been mapped against the SDGs as set out below.

## ESG purpose and objectives

### To mitigate climate change where we can make the most impact

- Highlighting of red flags during diligence with strict de-selection process
- Creating new energy sources with cost effective energy supplies
- Ensuring stable supply of new clean renewable energy

### To positively impact the communities in which we work

- 14,000 direct jobs and indirect jobs created by the Investment Manager
- Risk analysis of supply chain and continued monitoring of suppliers
- Targeted community programmes to address local needs and issues

### To maintain ethics and integrity in governance

- A+ PRI rating
- Board representation on all investments
- Engage with relevant industry bodies
- Consider relevant legislation and government policy developments
- Health and safety policies implemented and audited at all investment entities

**About TLEI**

TLEI is listed on the premium segment of the main market of the London Stock Exchange, as of December 2021. The Company was awarded the Green Economy Mark upon admission.

In 2021, ThomasLloyd Group participated in the Mobilising Institutional Capital Through Listed Product Structures (MOBILIST) competition, a competition run by the UK government to engage financial institutions in a search for the best listed sustainable infrastructure proposal. ThomasLloyd was the first successful winner in this competition and the Company has received US\$32.3 million in investment from the UK government.

The Company's triple return investment objective is focused on generating additional value for its investors through focusing its investments on construction-ready or in-construction projects.

As is the case for all ThomasLloyd funds, the Company is expected to qualify as an Article 9 fund under the EU Sustainable Finance Disclosure Regulation.

**About the Investment Manager**

The Investment Manager (the "IM") is a wholly-owned subsidiary of ThomasLloyd Group ("ThomasLloyd"). Founded in 2003, ThomasLloyd is a leading impact investor and provider of climate financing. ThomasLloyd is a pure play impact investor and aims to apply a robust, socially and environmentally responsible investment approach that is geared towards reducing carbon emissions and improving economic prospects, while reducing investment risk through diversification across countries, sectors and technologies.

Over the last decade, ThomasLloyd has deployed over US\$1 billion across 16 projects in renewable energy power generation, transmission and sustainable fuel production with a total capacity in excess of 700 MW.

Since 2013, the firm has been measuring and reporting on the impact of its investments, creating an empirical database showing the positive impact of their investments in sustainable energy infrastructure in high growth and emerging markets in Asia.

**About the Investment Opportunity**

A compelling investment opportunity arising from the growth in GDP, population and urbanisation driving power demand in low and middle income countries ("LMIC") in Asia:

- First ever dedicated offering on the London Stock Exchange providing direct access to sustainable real assets in fast-growing and emerging economies in Asia.
- Asia's 4.6bn people account for more than half of global energy consumption – 85% of that consumption is from fossil fuels. Carbon emissions in Asia are now greater than Europe and North America combined.
- Economic and population growth, together with rapid urbanisation, in Low Middle Income Countries ("LMIC") in Asia is driving huge demand for funding to develop and upgrade existing energy infrastructure.
- The average 'carbon cost' of GDP (being the amount of carbon released in proportion to the generation of US\$1 of GDP) in Asia is almost four times as high as that of the four largest economies in Europe, making investment in Asian renewable energy vital to achieving a Net Zero world by 2050.
- The Company believes that private capital will play a critical role in closing the funding gap in the expected US\$1 trillion funding shortfall for current infrastructure investment spend across India, the Philippines, Indonesia, Vietnam and Bangladesh.
- TLEI intends to provide investors with an attractive level of dividend income and the prospects of dividend growth and capital appreciation over the long term, delivered with low volatility and uncorrelated to other asset classes and also offers geographical portfolio diversification to investors who already have exposure to infrastructure assets in developed markets.
