

# Factsheet

**ThomasLloyd Energy Impact Trust PLC**  
June 2022 Factsheet

The Company seeks to achieve its investment objective by investing directly, predominantly via equity and equity-like instruments, in a diversified portfolio of unlisted sustainable energy infrastructure assets in the areas of renewable energy power generation, transmission infrastructure, energy storage and sustainable fuel production, with a geographic focus on fast-growing and emerging economies in Asia.

## Key statistics at 30 June 2022

NAV per share	Net assets	NAV total return per share
99.9 cents	\$115m	2.4%
Ordinary share price	Market capitalisation	Market capitalisation, including SolarArise acquisition*
US\$1.13 87.5 GBP pence	US\$130m	US\$160m
IPO proceeds committed**	Portfolio growth from IPO	Pipeline
66%	10%	US\$750m+
Emissions avoided	Energy security	Employment opportunities
90,566 tCO <sub>2</sub> e	356,291 people	335 jobs

Past performance is not a guide to future performance. There is no guarantee that the target returns contained in this document will be achieved.

\* Including shares issued on 19 August 2022 in relation to the acquisition of a 43% interest in SolarArise

\*\* As a percentage of net IPO proceeds, including shares issued on 19 August 2022 in relation to the acquisition of a 43% interest in SolarArise

## Highlights

### At 30 June 2022:

- US\$150 million raised at IPO.<sup>1</sup>
- Acquisition of a 40% economic interest in NISPI completed in December 2021, for a cash consideration of US\$25.4 million.
- The fair value of NISPI increased by 10% to 30 June 2022, driven by continued strengthening of local wholesale electricity market prices.
- In June, the acquisition of the remaining 57% economic interest of SolarArise was agreed for consideration of US\$38.5 million, in addition to the acquisition of the 43% economic interest committed to at IPO. The acquisition of the 57% economic interest will be funded from existing cash resources.
- Maiden quarterly interim dividend of 0.44 cents per share paid in June 2022.

1 Being US\$115m IPO Proceeds and the initial fair value of the ordinary shares to be issued in relation to the acquisition of a 43% interest in SolarArise.

### Subsequent to 30 June 2022:

- Second quarterly dividend of 0.44 cents per share announced that will be paid on 30 September 2022, with Company on target for a first year dividend of 2-3%.
- Acquisition of the 43% economic interest in SolarArise completed on 19 August 2022, for consideration of US\$32.9 million (equal to fair value of interest at 30 June 2022).
- Acquisition price settled by issuing 26.0 million ordinary shares at US\$1.16035 per share to the sellers and a cash payment of US\$2.7 million (withheld to fund withholding tax payable to the Indian tax authorities by TLEI on behalf of sellers).
- Market capitalisation on completion of the acquisition of the 43% economic interest in SolarArise was US\$168 million. For illustrative purposes, if the ordinary shares issued in relation to the acquisition had been in issue at 30 June 2022, TLEI's net assets would have been US\$145 million, resulting in a NAV per share of 102.4 cents.

<sup>1</sup> Construction-ready asset

Platform	Technology	Country	Sites	Revenue type	Renewable energy generating capacity (MWp)	Average remaining life of asset	Economic ownership
NISPI	Solar	Philippines	3 operational	Wholesale electricity spot market price	80	19 years	40%
SolarArise <sup>1</sup>	Solar	India	6 operational 1 construction-ready	25-year fixed-price PPA	434	21 years	100%

<sup>1</sup> Represents the committed acquisition of a 43% interest in SolarArise at the date of IPO, subsequently completed on 19 August 2022, and the remaining 57% interest committed to be acquired in June 2022.

## Investment objective

To deliver a 'Triple Return' to investors and other stakeholders, comprising:

1. A financial return on investment
2. A measurable environmental return
3. A discernible social return

by investing in a diversified portfolio of unlisted sustainable energy infrastructure assets in the areas of renewable power generation, transmission infrastructure, energy storage and sustainable fuel production in fast-growing and emerging economies in Asia.

## Why invest

**Sustainable increasing dividend** – an annual target dividend of 2-3% for 2022, 5-6% for 2023 and at least 7% for 2024 (all based on the IPO price of US\$1.00), with the aim of progressively increasing this target thereafter

**Attractive capital returns** – a target NAV total return of 10-12% per annum (based on the IPO price of US\$1.00), once the portfolio is fully operational on a fully invested and geared basis (net of all fees, expenses and taxes)

**Make a tangible change** – a compelling opportunity for investors wishing to mitigate or balance ESG and climate risks in their portfolio

**Geographical diversification** – a unique opportunity to invest in Asia, providing diversification for investors who already have exposure to developed market infrastructure

**Highly experienced Investment Manager** – experience of deploying US\$1bn+ in sustainable energy infrastructure assets (700 MW+) in TLEI's target markets.

## Sustainable development goals

The United Nations Sustainable Development Goals "SDGs" are a set of 17 goals for sustainable development. They address a range of social needs, including education, health, social protection and job opportunities while tackling climate change and environmental protection. TLEI's portfolio has been mapped against the SDGs as set out below.

## ESG purpose and objectives

### To mitigate climate change where we can make the most impact

- Highlighting of red flags during diligence with strict de-selection process
- Creating new energy sources with cost effective energy supplies
- Ensuring stable supply of new clean renewable energy

### To positively impact the communities in which we work

- Create direct and indirect jobs
- Risk analysis of supply chain and continued monitoring of suppliers
- Support community programmes to address local needs and issues

### To maintain ethics and integrity in governance

- Board representation on all investments
- Engage with relevant industry bodies
- Consider relevant legislation and government policy developments
- Health and safety policies implemented and audited at all investment entities

**About TLEI**

TLEI is listed on the premium segment of the main market of the London Stock Exchange, as of December 2021. The Company was awarded the Green Economy Mark upon admission.

In 2021, ThomasLloyd Group participated in the Mobilising Institutional Capital Through Listed Product Structures (MOBLIST) competition, a competition run by the UK government to engage financial institutions in a search for the best listed sustainable infrastructure proposal. ThomasLloyd was the first successful winner in this competition and the Company has received US\$32.3 million in investment from the UK government.

The Company's Triple Return investment objective is focused on generating additional value for its investors through focusing its investments on construction-ready or in-construction projects.

As is the case for all ThomasLloyd funds, the Company is expected to qualify as an Article 9 fund under the EU Sustainable Finance Disclosure Regulation.

**About the Investment Manager**

The Investment Manager is a wholly-owned subsidiary of ThomasLloyd Group ("ThomasLloyd"). Founded in 2003, ThomasLloyd is a leading impact investor and provider of climate financing. ThomasLloyd is a pure play impact investor and aims to apply a robust, socially and environmentally responsible investment approach that is geared towards reducing carbon emissions and improving economic prospects, while reducing investment risk through diversification across countries, sectors and technologies.

Over the last decade, ThomasLloyd has deployed over US\$1 billion across 16 projects in renewable energy power generation, transmission and sustainable fuel production with a total capacity in excess of 700 MW.

Since 2013, the firm has been measuring and reporting on the impact of its investments, creating an empirical database showing the positive impact of their investments in sustainable energy infrastructure in high growth and emerging markets in Asia.

**About the investment opportunity**

A compelling investment opportunity arising from the growth in GDP, population and urbanisation driving power demand in low and middle income countries ("LMICs") in Asia:

- First ever dedicated offering on the London Stock Exchange providing direct access to sustainable real assets in fast-growing and emerging economies in Asia.
- Asia's 4.6bn people account for more than half of global energy consumption – 85% of that consumption is from fossil fuels. Carbon emissions in Asia are now greater than Europe and North America combined.
- Economic and population growth, together with rapid urbanisation, in LMICs in Asia is driving huge demand for funding to develop and upgrade existing energy infrastructure.
- The average 'carbon cost' of GDP (being the amount of carbon released in proportion to the generation of US\$1 of GDP) in Asia is almost four times as high as that of the four largest economies in Europe, making investment in Asian renewable energy vital to achieving a Net Zero world by 2050.
- The Company believes that private capital will play a critical role in closing the funding gap in the expected US\$1 trillion funding shortfall for current infrastructure investment spend across India, the Philippines, Indonesia, Vietnam and Bangladesh.
- TLEI intends to provide investors with an attractive level of dividend income and the prospects of dividend growth and capital appreciation over the long term, delivered with low volatility and uncorrelated to other asset classes and also offers geographical portfolio diversification to investors who already have exposure to infrastructure assets in developed markets.
